# Introduction

While (DeFi) Decentralized Finance is continuing to make impactful graphs and maintain its parabolic sequence, yield farming remains a popular aspect for earning returns from long-term holdings. For the non initiated, yield farming is actually the mode of staking your assets into a platform to generate yield.

Pontus Chain

Our Mission is to  
make PONTUS farm  
on the Binance  
Smart Chain  
platform,  
possessing  
transparent and fair  
transitions&  
generating great  
bonuses.

# Platform

We are going on Binance Smart Chain as the axis platform other than Ethereum for Yield farming because Ethereum has been in extreme network tornados. Gas price has hiked up dramatically, even for simple transactions. Hike in the gas price has made it impossible for many users to use the Ethereum blockchain because it is no longer economically useable. Hence, we select the Binance Smart Chain platform, which will be best for all users of Pontus Chain.

## Pontus Chain

DeFi on Ethereum is more likely given to immense giant whales those have millions of dollars. They will gradually shift to the Binance Smart Chain Network in the coming future, which will lead to the advantages of Pontus Chain. We have a farm for top coins, that have Bitcoins and Dogecoins etc. The leading coins in the market.
